Objective

Highly motivated Computer Science student with a strong foundation in software development and backend engineering. Seeking an internship to apply programming skills, contribute to impactful projects, and gain hands-on experience in building scalable applications.

Education

Yarmouk University – Computer Science

Bachelor of Science (B.Sc.) | Expected Graduation: 2026

GPA: 3.5 / 4.0

Technical Skills

- **Languages:** Python, JavaScript, SQL, Dart
 - **Frameworks/Tools:** FastAPI, React, Node.js, PostgreSQL, Firebase
 - **Development:** REST APIs, MVC architecture, Frontend/Backend integration
 - **Other:** Git, Agile methodology, Version control, Problem-solving
-

Projects & Experience

Backend Developer Intern – TechCo (Sample Project)

- Built scalable REST APIs using Python and FastAPI.
- Integrated database queries with PostgreSQL for efficient data management.
- Implemented authentication and role-based access for multiple user types.

Frontend Project – React Movie Website

- Developed responsive UI for booking and checkout using HTML, CSS, JavaScript, and Bootstrap.
- Implemented dynamic ticket selection and real-time price calculation.

StrayGuard – Civic App (Academic Project)

- Developed reporting and assignment management system for stray animals.
 - Implemented JWT-based authentication and notifications for multiple roles.
-

Certifications

- Full-Stack Web Development (React & Node.js) – HTUX
 - Arduino Programming – Skitech
-

Additional Activities

- Member of CIS Student Association, Yarmouk University
- Participated in hackathons and coding challenges
